

History

The Atlases of Tumor Pathology have a long and distinguished history. They were first conceived at a cancer research meeting held in St. Louis in September 1947, as an attempt to standardize the nomenclature of neoplastic diseases. For many years, the AFIP (Armed Forces Institute of Pathology) and ARP collaborated on publishing the atlases. Since the AFIP closed in 2011, the sole steward and publisher of this valuable resource is the American Registry of Pathology.

The ARP Mission

The ARP's mission is to advance, educate, and connect the field of pathology by providing the highest quality educational content and expertise.

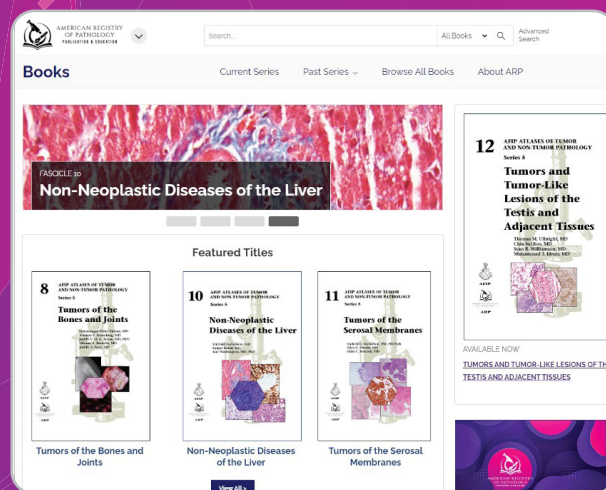

We are honored to have a remarkable group of pathologists comprising our overall Board of Directors as well as the Editorial Advisory Board for ARP Press. Their expertise and leadership are key to ARP maintaining focus on the mission.

Institutional Access

ARP launched a brand new web platform for our publications in mid-2022.

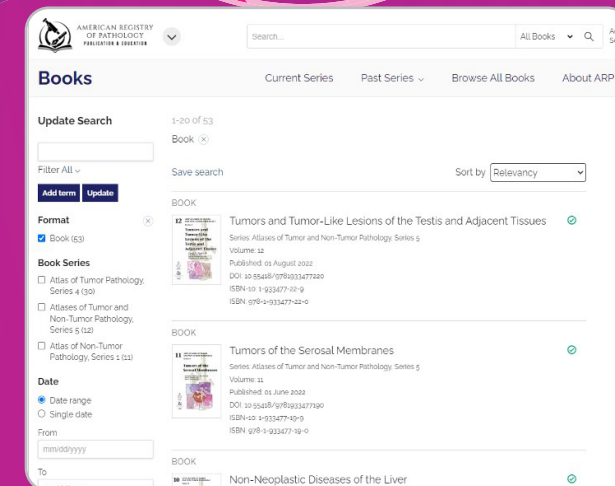

With this launch, ARP Press has transitioned from print-focused activities to a balanced print and online publishing program, all available at www.arppress.org.

This new platform optimizes accessibility and discoverability of ARP's comprehensive content, including the ongoing 5th series of tumor and non-tumor pathology, the 4th series of tumor pathology, and the 1st series of non-tumor pathology. **The platform offers pathologists robust search opportunities across the entire series** for images and text covering clinical features, the extensive banks of gross and microscopic images, differential diagnoses, immuno-histochemistry, molecular biology, treatment, and prognosis.

In conjunction with this new venture, **ARP has launched Institutional Access to our site that can be utilized by staff and students in the pathology community.** This is an annual subscription with tiered pricing to make it accessible to a wide variety of organizations, such as libraries and laboratories.

We believe this is a valuable resource for pathologists in practice as well as in residency and fellowship training programs. It also gives users the ability to enlarge and download figures and tables for use in educational lectures and presentations.

If you're interested in talking with an ARP representative about scheduling a demonstration, pricing, or just have more questions, email sales@arppress.org
