

CONTENTS

1. Anatomy of the Heart and Blood Vessels	1
Cardiac Embryology	1
Formation of the Heart Tube	1
Looping of the Heart Tube and Septation	1
Anatomy of the Heart and Great Vessels.	2
Cardiac Position	2
External Cardiac Anatomy	2
Internal Cardiac Anatomy	3
Cardiac Histology and Ultrastructure	10
Anatomy and Histology of Blood Vessels	13
Elastic Arteries	13
Muscular Arteries	14
Veins	14
2. Heart Tumors: Classification and Overview	17
Classification	17
Clinical Features.	19
Pathologic Findings	20
Staging	20
Treatment.	20
Prognosis	21
3. Imaging of Cardiac Masses.	25
Imaging Characteristics and Differential Diagnosis of Cardiac Masses	26
Radiologic Features of Primary Cardiac Neoplasms	34
Myxoma	34
Rhabdomyoma	38
Fibroma	40
Papillary Fibroelastoma	41
Cardiac Sarcomas	43
4. Tumor-Like Lesions of the Heart	53
Mural Thrombus	53
Blood Cyst	59
Cardiac Varix	61
Parasitic Cysts	62
Inflammatory Masses.	64
Mitral Annular Calcification Resulting in Pseudotumor (Caseous Calcification)	69

	Mesothelial Incidental Cardiac Excrescences	71
	Pseudotendon	72
5.	Cardiac Myxoma	79
	General Features	79
	Clinical Features.	79
	Carney Complex	82
	Radiologic Findings	83
	Gross Findings	83
	Microscopic Findings.	87
	Immunohistochemical Findings	96
	Differential Diagnosis	100
	Spread and Metastasis	100
	Treatment.	102
	Recurrence	102
	Prognosis	103
6.	Papillary Fibroelastoma	109
	Definition.	109
	General Features	109
	Clinical Features.	110
	Gross Findings	111
	Microscopic Findings.	114
	Ultrastructural Findings.	116
	Differential Diagnosis	116
	Treatment.	117
	Prognosis	117
7.	Cardiac Fibroma	121
	Definition.	121
	General Features	121
	Clinical Features.	121
	Gross Findings	123
	Microscopic Findings.	124
	Immunohistochemical Findings	126
	Ultrastructural Findings.	132
	Molecular Findings	132
	Differential Diagnosis	132
	Treatment.	132
	Prognosis	133

8.	Cardiac Rhabdomyoma	137
	Definition.	137
	General Features	137
	Clinical Features.	137
	Gross Findings	139
	Microscopic Findings.	142
	Ultrastructural and Immunohistochemical Findings	144
	Differential Diagnosis	144
	Treatment.	146
	Prognosis	146
9.	Histiocytoid Cardiomyopathy	151
	Definition.	151
	General Features	151
	Clinical Features.	151
	Gross Findings	153
	Microscopic Findings.	153
	Immunohistochemical Findings.	156
	Ultrastructural Findings.	160
	Molecular Findings	161
	Treatment and Prognosis.	162
10.	Cardiac Hemangioma and Lymphangioma	165
	Hemangioma	165
	Lymphangioma	181
11.	Benign Tumors of Fatty Tissue	189
	Lipomatous Hypertrophy of the Atrial Septum	189
	Lipoma	193
	Lipomatous Hamartoma of Cardiac Valves.	195
	The Fatty Heart	196
12.	Cardiac Paraganglioma.	201
	Definition.	201
	General Features	201
	Clinical Features.	202
	Gross Findings	203
	Microscopic Findings.	205
	Differential Diagnosis	216
	Treatment and Prognosis.	216
13.	Miscellaneous Benign Soft Tissue Tumors	219
	Hamartoma of Mature Cardiac Myocytes	219

Adult Cellular Rhabdomyoma	223
Granular Cell Tumor	223
Schwannoma	228
Leiomyoma and Leiomyomatosis	229
Solitary Fibrous Tumor	231
Inflammatory Myofibroblastic Tumor	233
14. Heterotopias and Germ Cell Tumors	241
Bronchogenic Cyst	241
Cystic Tumor of the Atrioventricular Node	243
Cardiac Germ Cell Tumors	248
Cardiac Teratoma	249
Intrapericardial Yolk Sac Tumors	254
Thyroid Heterotopia	254
Pericardial Thymoma and Ectopic Thymic Tissue	257
Ectopic Liver	257
15. Cardiac Angiosarcoma and Epithelioid Hemangioendothelioma	265
Cardiac Angiosarcoma	265
Epithelioid Hemangioendothelioma	283
16. Primary Cardiac Sarcomas, Other Than Angiosarcoma	291
General Features	291
Grading	295
Clinical and Radiologic Features	296
Tissue Sampling and Gross Specimen Handling	297
Sarcoma Variants	297
Cardiac Sarcomas of “Intimal” Origin	297
Undifferentiated Cardiac Sarcomas	298
Undifferentiated Pleomorphic Sarcoma	299
Cardiac Myxofibrosarcoma	302
Leiomyosarcoma	312
Rhabdomyosarcoma	312
Cardiac Osteosarcoma	317
Synovial Sarcoma	317
Miscellaneous Cardiac Sarcomas	326
Sarcomas of Cardiac Valves	328
Sarcomas in Infants and Children	328
Pericardial Sarcomas	328
Differential Diagnosis	328
Treatment	329
Prognosis	329

17. Hematologic Tumors of the Heart and Pericardium	337
Cardiac Lymphoma	337
Cardiac Lymphomas in Immunocompromised Patients.	347
Secondary Cardiac Involvement in Lymphoma	349
Miscellaneous Hematologic Lesions of the Heart	350
Granulocytic Sarcoma	350
Erdheim-Chester Disease	350
Giant Lymph Node Hyperplasia of Mediastinum (Castleman Disease)	350
Rosai-Dorfman Disease.	350
Langerhans Cell Histiocytosis	350
Crystal-Storing Histiocytosis	351
18. Tumors Metastatic to the Heart	361
Myocardial Metastases	361
Clinical Features	361
Cardiac Spread of Metastases	362
Sites of Origin.	363
Gross Findings	364
Histologic Types of Metastases.	367
Treatment	377
Pericardial Metastases	378
Clinical Features	378
Sites of Origin.	380
Gross and Microscopic Findings	380
Treatment and Prognosis	382
19. Tumors of the Great Vessels	391
Aortic Intimal Sarcomas	391
Sarcomas of Peripheral Arteries	397
Pulmonary Artery Intimal Sarcomas	399
Sarcomas of Veins	405
Index.	413
