

CONTENTS

1.	Lung Cancer: Clinical Presentation, Epidemiology, Tumor Staging, Classification, Histologic Grading, and Spread Through Air Spaces	1
	Clinical Presentation	1
	Epidemiology	3
	Staging	5
	T Staging	6
	Use of Radiologic-Pathologic Correlation to Determine Tumor Size	11
	Pleural Invasion	12
	Direct Invasion Across an Interlobar Fissure	16
	Hilar Soft Tissue Invasion	17
	Separating Synchronous Primaries from Metastatic Carcinomas	17
	Staging in the Neoadjuvant Setting	26
	N Staging	26
	M Staging	28
	TNM Stage Groupings	34
	Residual Tumor Classification (R Category)	34
	Other Staging Prefixes	34
	World Health Organization Classification of Lung Tumors	34
	Histologic Grading	37
	Spread through Air Spaces	40
2.	Lung Cancer Diagnosis in Small Biopsy and Cytology Specimens	47
	Cytology Overview	47
	Diagnostic Approach	48
	Diagnostic Pitfalls	49
	Immunohistochemistry for Adenocarcinoma and Squamous Cell Markers	50
	Diagnostic Terminology and Criteria	50
	NSCC, NOS with Adenocarcinomatous and Squamous Differentiation	58
	NSCC with Spindle or Giant Cell Features	60
	Adenocarcinoma with Lepidic Pattern	60
	NSCC with Features of Large Cell Neuroendocrine Carcinoma	62
	Differential Diagnostic Issues	62
	Immunohistochemistry for Molecular Markers	62
	Pathology Reports	67
	Strategies for Managing Small Tissue Samples	67
	Value of Cytology Specimens for Cell Blocks and Biopsy Correlation	67
	Need for Multidisciplinary Team	67

3.	Molecular Features of Lung Cancer	73
	Key Molecular Pathways in Lung Cancer	74
	Adenocarcinoma Genetics	74
	Squamous Cell Carcinoma Genetics	79
	Neuroendocrine Lung Tumor Genetics	80
	Small Cell Lung Carcinoma.	80
	Large Cell Neuroendocrine Carcinoma	82
	Carcinoid Tumors	84
	Epigenetic Changes in Lung Cancer	84
4.	Adenocarcinoma: Major Subtypes	89
	General Features	89
	Clinical Features	90
	Radiologic Findings	91
	Gross Findings	93
	Cytologic Findings	94
	Histologic Findings.	100
	Nonmucinous Lepidic-Predominant Adenocarcinomas.	100
	Acinar-Predominant Adenocarcinoma	102
	Papillary-Predominant Adenocarcinoma	104
	Micropapillary-Predominant Adenocarcinoma.	109
	Solid-Predominant Adenocarcinoma	110
	Minimally Invasive Adenocarcinoma, Nonmucinous and Mucinous.	112
	Preinvasive Lesions.	114
	Atypical Adenomatous Hyperplasia	114
	Adenocarcinoma In Situ, Nonmucinous and Mucinous.	116
	Diagnosis of AIS or MIA.	117
	Spread through Air Spaces.	120
	Molecular Histologic Correlations	122
	Immunohistochemical Findings	123
	Differential Diagnosis.	124
	Cytologic Differential Diagnosis	124
	Histologic Differential Diagnosis.	126
	Treatment and Prognosis	135
	Prognostic and Predictive Implications of Comprehensive Histologic Subtyping	135
	Lepidic Predominant	135
	Micropapillary Predominant	136
	Solid Predominant	136
	Acinar and Papillary Predominant	136
	Adenocarcinoma in Situ and Minimally Invasive Adenocarcinoma	137
	Prediction of Response to Adjuvant Chemotherapy.	137
	Other Prognostic Factors	137

5.	Adenocarcinoma Variants and Rare Patterns	149
	Clinical and Radiologic Features	149
	Gross Findings	149
	Cytologic Findings	149
	Histologic Findings.	153
	Invasive Mucinous Adenocarcinoma	153
	Colloid Adenocarcinoma.	158
	Fetal Adenocarcinoma	159
	Enteric Differentiation.	163
	Signet Ring, Clear Cell, Rhabdoid, and Hepatoid Subtypes	163
	Rare Patterns of Lung Adenocarcinoma	169
	Prognostic Factors	172
	Invasive Mucinous Adenocarcinoma	172
	Colloid Adenocarcinoma.	172
	Fetal Adenocarcinoma	173
	Enteric Adenocarcinoma	173
6.	Squamous Cell Carcinoma	179
	Clinical Features	179
	Incidence	179
	Etiology	179
	Clinical Presentation	180
	Gross Findings	180
	Cytologic Findings	181
	Microscopic Findings	187
	Immunohistochemical Findings	193
	Ultrastructural Findings	193
	Molecular Genetic Findings.	194
	Differential Diagnosis.	194
	Cytologic Differential Diagnosis	194
	Histologic Differential Diagnosis.	194
	Treatment and Prognosis	196
	Basaloid Squamous Cell Carcinoma.	196
	Squamous Cell Carcinoma in Situ and Squamous Dysplasia	200
7.	Small Cell Carcinoma	211
	Clinical Features	211
	Gross Findings	212
	Cytologic Findings	212
	Histopathologic Findings.	214
	Small Cell Carcinoma	214
	Combined Small Cell and Large Cell Carcinoma	219

7.	Small Cell Carcinoma, continued	
	Combined Small Cell Adenocarcinoma, Squamous Cell, Giant Cell, Spindle Cell Carcinoma	219
	Therapeutic Effect on SCLC.	219
	Immunohistochemical Findings	220
	Molecular Genetic Findings	222
	Differential Diagnosis.	222
	Histologic Differential Diagnosis.	222
	Cytologic Differential Diagnosis	223
	Treatment and Prognosis	225
8.	Large Cell Neuroendocrine Carcinoma	229
	Clinical Features	229
	Gross Findings	229
	Cytologic Findings	229
	Histologic Findings.	230
	Immunohistochemical and Ultrastructural Findings	233
	Molecular Genetic Findings	235
	Differential Diagnosis.	235
	Histologic Differential Diagnosis.	235
	Cytologic Differential Diagnosis	236
	Treatment and Prognosis	237
9.	Pulmonary Neuroendocrine Tumors, Carcinoid Tumors, and Carcinoid Tumorlets	241
	Pulmonary Tumors with Neuroendocrine Morphology	241
	Nonsmall Cell Carcinomas with Neuroendocrine Differentiation	243
	Neuroendocrine Cells and Neuroendocrine Bodies.	243
	Carcinoid Tumorlet	244
	Diffuse Idiopathic Pulmonary Neuroendocrine Cell Hyperplasia.	248
	Neuroendocrine Cell Hyperplasia of Infancy	250
	Typical and Atypical Carcinoid Tumors.	250
	Paraganglioma	265
10.	Large Cell Carcinoma	273
	Clinical Features	276
	Gross Findings	278
	Cytologic Findings	278
	Histologic Findings.	278
	Immunohistochemical and Ultrastructural Findings	279
	Molecular Genetic Findings	280
	Differential Diagnosis.	280
	Treatment and Prognosis	281

11. Adenosquamous Carcinoma.	283
Clinical Features	283
Gross Findings	283
Cytologic Findings	283
Histologic Findings.	283
Immunohistochemical Findings	284
Molecular Genetic Findings	286
Differential Diagnosis.	288
Treatment and Prognosis	290
12. Pleomorphic, Spindle Cell, and Giant Cell Carcinomas; Carcinosarcoma; and Pulmonary Blastoma.	293
Pleomorphic Carcinoma, Spindle Cell Carcinoma, and Giant Cell Carcinoma	294
General Features.	294
Clinical Features.	295
Gross Findings	295
Cytologic Findings.	296
Microscopic Findings.	296
Spindle Cell Carcinoma.	305
Giant Cell Carcinoma	306
Immunohistochemical and Ultrastructural Findings	308
Molecular Genetic Findings.	309
Differential Diagnosis	312
Treatment and Prognosis.	312
Pulmonary Blastoma	314
General Features.	314
Clinical Features.	314
Gross Findings	314
Cytologic Findings.	314
Microscopic Findings.	316
Immunohistochemical Findings	317
Molecular Genetic Findings.	318
Differential Diagnosis	319
Treatment and Prognosis.	321
Carcinosarcoma	321
Clinical Features.	321
Gross Findings	322
Cytologic Findings.	322
Microscopic Findings.	322
Immunohistochemical Findings	326
Molecular Genetic Findings.	326

12.	Pleomorphic, Spindle Cell, and Giant Cell Carcinoma; Carcinosarcoma; and Pulmonary Blastoma, continued	
	Differential Diagnosis	326
	Treatment and Prognosis	326
13.	Unclassifiable and Miscellaneous Carcinomas	333
	Lymphoepithelioma-Like Carcinoma	333
	Nut Carcinoma	335
14.	Tumors of Salivary Gland Type	339
	Adenoid Cystic Carcinoma	339
	Mucoepidermoid Carcinoma	346
	Epithelial-Myoepithelial Carcinoma	355
	Other Rare Salivary Gland Tumors	359
	Acinic Cell Carcinoma	359
	Mixed Tumors	361
	Other Entities	363
15.	Adenomas	371
	Sclerosing Pneumocytoma	371
	Alveolar Adenoma	378
	Papillary Adenoma	381
	Mucinous Cystadenoma	384
	Mucous Gland Adenoma	385
	Bronchiolar Adenoma	389
16.	Papillomas	397
	Squamous Cell Papilloma	397
	Glandular Papillomas	406
	Mixed Squamous Cell and Glandular Papilloma	408
17.	Soft Tissue Tumors	417
	Pulmonary Hamartoma	419
	Fibroblastic and Myofibroblastic Tumors and Tumor-Like Conditions	427
	Inflammatory Myofibroblastic Tumor	427
	Intrapulmonary Solitary Fibrous Tumor	441
	Congenital Peribronchial Myofibroblastic Tumor	446
	Intrapulmonary Calcifying Fibrous Pseudotumor	446
	Pulmonary Microcystic Fibromyxoma	448
	Fibrosarcoma	448
	Desmoid Tumor	449
	Vascular Tumors	452
	Epithelioid Hemangioendothelioma	452
	Angiosarcoma	460
	Kaposi Sarcoma	464
	Hemangioma	469

17. Soft Tissue Tumors, continued	
Lymphangioma	474
Diffuse Pulmonary Lymphangiomatosis	476
Pseudomyogenic Hemangioendothelioma	477
PEComatous Tumors	479
Smooth Muscle and Pericytic Tumors	487
Leiomyoma and Leiomyosarcoma	487
Glomus Tumors	492
Skeletal Muscle Tumors	496
Rhabdomyosarcoma	496
Neurogenic Tumors	499
Schwannoma and Neurofibroma	499
Neuroma and Ganglioneuroma	499
Malignant Peripheral Nerve Sheath Tumors	499
Ganglioneuroblastoma and Neuroblastoma	500
Meningioma	502
Granular Cell Tumor	505
Ependymoma	507
Ewing Sarcoma	507
Chondrogenic Tumors	509
Chondroma	509
Chondrosarcoma	509
Osteogenic Tumors	509
Osteosarcoma	509
Adipocytic Tumors	511
Lipoma	511
Atypical Lipoma and Lipoblastoma	512
Liposarcomas	512
Tumors of Uncertain Histogenesis	513
Synovial Sarcoma	513
Pulmonary Artery and Pulmonary Vein Intimal Sarcoma	517
Myoepithelial Tumors	518
Pleuropulmonary Blastoma	523
Fetal Lung Interstitial Tumor	529
Primary Pulmonary Myxoid Sarcoma with <i>EWSR1-CREB1</i> Gene Fusion	529
Angiomatoid Fibrous Histiocytoma	532
Desmoplastic Small Round Cell Tumor	532
Alveolar Soft Part Sarcoma	534
Undifferentiated Round Cell Sarcoma with <i>CIC-DUX4</i> Fusion	535

18. Tumors of Ectopic Origin	559
Malignant Melanoma	559
Primary Germ Cell Tumors	561
Intrapulmonary Thymoma	562
19. Lymphoproliferative Disorders	567
Lymphatics and Lymphoid Tissue in the Lung	567
Lymphomas Presenting in the Lung	569
Marginal Zone B-Cell Lymphoma of Mucosa-Associated Lymphoid Tissue (MALT) Origin	569
Primary Pulmonary Diffuse Large B-Cell Non-Hodgkin Lymphoma	578
Lymphomatoid Granulomatosis	580
Primary Pulmonary Hodgkin Lymphoma	584
Anaplastic Large Cell Lymphoma	584
Pulmonary Plasmacytoma	585
Mast Cell Tumor	586
Systemic Lymphoproliferative Diseases Secondarily Involving the Lungs	586
Intravascular Lymphoma	586
Peripheral T-Cell Non-Hodgkin Lymphomas	587
Leukemic Infiltration in the Lung	588
Myelofibrosis and Extramedullary Hematopoiesis	589
Histiocytic Neoplasms	589
Langerhans Cell Histiocytosis	589
Erdheim-Chester Disease	592
Reactive Lymphoproliferative Disorders	593
Diffuse Pulmonary Lymphoid Hyperplasia	593
Nodular Lymphoid Hyperplasia	595
Angiofollicular Lymph Node Hyperplasia (Castleman Disease)	596
IgG4-Related Disease	597
Reactive Lymphoid Hyperplasia in Association with Other Disorders	599
Post-Transplantation Lymphoproliferative Disorders	599
20. Tumor-Like Lesions	615
Meningothelioid Nodules and Meningotheliomatosis	615
Amyloidosis	617
Pulmonary Hyalinizing Granuloma	621
Micronodular Pneumocyte Hyperplasia	623
Endometriosis	624
Bronchial Inflammatory Polyp	626
Rounded Atelectasis	628
Malakoplakia	629

21. Metastatic Tumors.	639
Patterns of Metastases	639
Multiple Nodules	639
Solitary Pulmonary Metastasis.	641
Lymphangitic Metastasis	642
Endobronchial Metastasis	646
Metastatic Tumor Embolization	646
Pleural Metastases	650
Distinctive Growth Patterns.	651
Lepidic Growth Pattern	651
Interstitial Spread.	651
Cavitation and Cystic Changes.	652
Nodal Spread from Metastases.	653
Nonangiogenic Metastases and Spread through Air Spaces (STAS).	655
Cytology of Metastases to the Lung.	655
Distinction of Primary Pulmonary Tumors from Metastases	657
Clinical Data	657
Microscopy.	657
Immunohistochemistry.	658
Ultrastructure.	663
Molecular Genetic Pathology	663
Treatment of Metastases.	663
Index.	671
