

## Contents

Abbreviations . . . . .	xv
1. Pituitary Gland . . . . .	1
Normal Pituitary Gland . . . . .	1
Embryology . . . . .	1
Gross Anatomy . . . . .	1
Microscopic Anatomy and Physiology . . . . .	4
Somatotroph (GH) Cells . . . . .	6
Lactotroph (PRL) Cells . . . . .	8
Mammotroph (PRL/GH) Cells . . . . .	8
Corticotroph (ACTH) Cells . . . . .	10
Thyrotroph (TSH) Cells . . . . .	10
Gonadotroph (FSH/LH) Cells . . . . .	11
Folliculostellate Cells . . . . .	11
Neurohypophysis . . . . .	14
Reactive Changes . . . . .	14
Pregnancy . . . . .	14
Hormonal Syndromes . . . . .	14
Effects of Specific Drugs . . . . .	15
Hereditary and Developmental Disorders . . . . .	18
Agenesis of the Pituitary . . . . .	18
Pituitary Hypoplasia . . . . .	18
Ataxia-Telangiectasia Syndrome . . . . .	18
Empty Sella Syndrome . . . . .	19
Isolated Hormone Deficiency . . . . .	19
Transcription Factor Deficiencies . . . . .	21
Circulatory Disorders . . . . .	21
Pituitary Apoplexy . . . . .	21
Sheehan's Syndrome . . . . .	21
Miscellaneous Conditions Causing Pituitary Infarction . . . . .	21
Exogenous Injury . . . . .	21
Metabolic Disorders . . . . .	22
Amyloid Deposits . . . . .	22
Iron Overload . . . . .	22
Miscellaneous Metabolic Conditions . . . . .	23

Infectious Diseases . . . . .	23
Acute Inflammation . . . . .	23
Granulomatous Inflammation . . . . .	23
Giant Cell Granuloma . . . . .	25
Langerhans' Cell Histiocytosis . . . . .	25
Autoimmune Diseases . . . . .	26
Lymphocytic Hypophysitis . . . . .	26
Autoantibodies to Anterior Pituitary Cells . . . . .	28
Autoimmune Diabetes Insipidus . . . . .	28
Autoimmune Polyglandular Syndromes . . . . .	28
Pituitary Cysts . . . . .	29
Rathke's Cleft Cyst . . . . .	29
Epidermoid Cysts . . . . .	30
Dermoid Cysts . . . . .	30
Pituitary Hyperplasia . . . . .	32
ACTH Cell Hyperplasia . . . . .	32
GH Cell Hyperplasia . . . . .	33
TSH Cell Hyperplasia . . . . .	36
Gonadotroph Hyperplasia . . . . .	37
PRL Cell Hyperplasia . . . . .	37
Differential Diagnosis of Pituitary Hyperplasia . . . . .	37
2. Parathyroid Gland. . . . .	45
Normal Parathyroid Gland. . . . .	45
Embryology . . . . .	45
Anatomy. . . . .	45
Histology . . . . .	46
Histochemistry . . . . .	49
Immunohistochemistry . . . . .	49
In Situ Hybridization . . . . .	51
Flow Cytometry . . . . .	51
Ultrastructure . . . . .	51
Molecular Biology and Physiology . . . . .	53
Overview of Hypercalcemia and Hypocalcemia . . . . .	54
Hypercalcemia . . . . .	54
Hyperparathyroidism. . . . .	54
Hereditary and Developmental Disorders . . . . .	60
Hypoparathyroidism . . . . .	60
DiGeorge's Syndrome. . . . .	60

Kearns-Sayre Syndrome . . . . .	61
Autoimmune Polyglandular Syndrome . . . . .	61
Pseudohypoparathyroidism . . . . .	61
Pseudopseudohypoparathyroidism . . . . .	61
Parathyroiditis . . . . .	61
Miscellaneous Conditions Causing Hypoparathyroidism. . . . .	62
Cysts and Hamartomas . . . . .	62
Parathyroid Cyst . . . . .	62
Parathyroid Hamartoma . . . . .	62
Hyperplasia . . . . .	64
Primary Chief Cell Hyperplasia . . . . .	64
Primary Clear Cell Hyperplasia . . . . .	73
Secondary and Tertiary Hyperparathyroidism . . . . .	74
Secondary Hyperparathyroidism . . . . .	74
Tertiary Hyperparathyroidism . . . . .	79
3. Thyroid Gland. . . . .	91
Normal Thyroid Gland. . . . .	91
Embryology . . . . .	91
Anatomy. . . . .	91
Histology . . . . .	92
Follicular Cells . . . . .	92
C Cells . . . . .	94
Solid Cell Nests. . . . .	94
Physiology . . . . .	95
Drugs Inhibitory to Thyroid Hormone Synthesis . . . . .	97
Peripheral Effects of Thyroid Hormone. . . . .	98
Abnormal Amounts of Iodine . . . . .	98
Amiodarone Toxicity . . . . .	98
Diphenylhydantoin (Phenytoin). . . . .	98
Reactive Changes . . . . .	98
Hereditary and Developmental Disorders . . . . .	101
Transcription Factor Deficiencies. . . . .	101
Genetic Disorders of the Thyrotropin Receptor Gene. . . . .	101
Aplasia and Hypoplasia . . . . .	101
Aberrant (Ectopic) Thyroid Tissue . . . . .	101
Thyroglossal Duct Cysts. . . . .	102
Parasitic Nodule . . . . .	105
Radiation Changes . . . . .	106

Miscellaneous Conditions . . . . .	107
Langerhans' Cell Granulomatosis (Histiocytosis X or Eosinophilic Granuloma) . .	107
Sinus Histiocytosis with Massive Lymphadenopathy . . . . .	107
Plasma Cell Granuloma . . . . .	108
Scleroderma . . . . .	108
Metabolic Diseases . . . . .	108
Glycogenesis . . . . .	108
Cystinosis . . . . .	108
Lipidoses . . . . .	108
Iron Pigment Accumulation . . . . .	108
Minocycline-Associated Changes . . . . .	108
Crystal Deposits in the Thyroid. . . . .	110
Teflon (Polytef) in Thyroid. . . . .	110
Infections and Granulomatous Diseases . . . . .	110
Acute Thyroiditis . . . . .	110
Granulomatous Thyroiditis . . . . .	111
Other Granulomatous Infections. . . . .	113
Autoimmune Thyroid Disease . . . . .	115
Hashimoto's Disease. . . . .	115
Graves' Disease. . . . .	126
Postpartum Thyroiditis . . . . .	133
Silent Thyroiditis . . . . .	134
Focal Lymphocytic Thyroiditis . . . . .	134
Riedel's Thyroiditis. . . . .	135
Simple, Multinodular, Dyshormonogenetic, and Diffuse Toxic Goiters . . . . .	137
Simple and Multinodular Nontoxic Goiter . . . . .	137
Dyshormonogenetic Goiter . . . . .	144
Toxic Multinodular Goiter. . . . .	146
Endemic Goiters. . . . .	149
Amyloid Goiter. . . . .	149
C-Cell Hyperplasia . . . . .	149
4. Adrenal Gland. . . . .	171
Normal Adrenal Gland. . . . .	171
Embryology . . . . .	171
Anatomy. . . . .	171
Ultrastructure . . . . .	178
Immunohistochemistry . . . . .	181
Molecular Biology and Physiology . . . . .	181

Reactive, Hereditary, and Developmental Disorders . . . . .	184
Adrenal Cytomegaly . . . . .	184
Focal Adrenalitis . . . . .	185
Ovarian Thecal Metaplasia . . . . .	185
Adrenal Hypoplasia . . . . .	185
Adrenal Malformations and Heterotopias . . . . .	187
Adrenal Rests and Accessory Adrenal Tissues . . . . .	187
Congenital Adrenal Hypoplasia . . . . .	189
Hereditary Adrenal Cortical Unresponsiveness to Adrenocorticotrophic Hormone . . . . .	189
Exogenous Injury . . . . .	189
Drugs . . . . .	189
Radiation . . . . .	189
Miscellaneous Drugs and Chemicals . . . . .	189
Infectious Diseases and Miscellaneous Conditions . . . . .	190
Tuberculous Adrenalitis . . . . .	190
Fungal Infections . . . . .	192
Acquired Immunodeficiency Syndrome Adrenalitis . . . . .	193
Miscellaneous Causes of Adrenalitis . . . . .	194
Adrenal Cortical Hypofunction . . . . .	194
Primary Adrenal Insufficiency . . . . .	194
Secondary and Tertiary Adrenal Insufficiency . . . . .	197
Isolated Mineralocorticoid Deficiency . . . . .	199
Adrenal Hemorrhage and Necrosis . . . . .	199
Metastatic Tumors Causing Adrenal Insufficiency . . . . .	201
Other Conditions Associated with Hypofunction . . . . .	203
Adrenal Amyloidosis . . . . .	203
Adrenoleukodystrophy . . . . .	203
Wolman's Disease . . . . .	205
Adrenal Cysts . . . . .	205
Adrenal Cortical Nodules and Hyperplasia . . . . .	207
Incidental Nonfunctional Adrenal Cortical Nodules . . . . .	209
Adrenal Cortical Hyperplasia . . . . .	212
Adrenocortical Macronodular Hyperplasia . . . . .	220
Primary Pigmented Nodular Adrenocortical Disease . . . . .	221
Aldosterone Excess Due to Adrenocortical Hyperplasia . . . . .	229
Unilateral Adrenal Cortical Hyperplasia . . . . .	231
Congenital Adrenal Hyperplasia . . . . .	232
Beckwith-Wiedemann Syndrome . . . . .	236
Adrenal Medullary Hyperplasia . . . . .	237

5. Diffuse Neuroendocrine System . . . . .	259
Embryology and Anatomy . . . . .	259
Development of DNES Concept and Embryology. . . . .	259
Pancreas . . . . .	261
Extra-Adrenal Paraganglia . . . . .	261
Lung . . . . .	261
Histology. . . . .	261
Pancreas . . . . .	261
Extra-Adrenal Paraganglia . . . . .	265
Lung . . . . .	265
Gastrointestinal Tract. . . . .	266
Methods Used to Characterize DNES Cells . . . . .	268
Histochemical Stains . . . . .	268
Immunohistochemical Stains . . . . .	268
Molecular Biology . . . . .	272
Hypofunction in Cells and Tissues of the DNES . . . . .	273
Polyglandular Autoimmune Syndrome . . . . .	273
Other Autoimmune Disorders Associated with Diabetes Mellitus . . . . .	274
Diabetes Mellitus . . . . .	274
DNES Cell Hyperplasia . . . . .	281
Pancreas: Hyperplasia in Infants of Diabetic Mothers. . . . .	282
Islet Cell Hyperplasia (Nesidioblastosis) in Children . . . . .	282
Nesidioblastosis in Adults . . . . .	287
Gastric Endocrine Cell Hyperplasia: Gastrin (G)-Cell Hyperplasia . . . . .	291
Enterochromaffin-Like Cell Hyperplasia . . . . .	292
Enterochromaffin Cell Hyperplasia . . . . .	294
Hyperplasia of Extra-Adrenal Paraganglia . . . . .	294
Pulmonary Endocrine Cell Hyperplasia. . . . .	296
Index . . . . .	309
