

CONTENTS

1. Embryology and Anatomy	1
Embryology	1
Anatomy and Histology	5
2. Handling and Analysis of Bronchoalveolar Lavage and Lung Biopsy Specimens with Approach to Patterns of Lung Injury	17
Clinical and Radiologic Correlation	17
Bronchoalveolar Lavage	18
Handling and Processing of Specimens	20
Types of Lung Biopsy Specimens	20
Transbronchial Biopsies	21
Surgical Lung Biopsies	22
Special Stains	23
Special Techniques	23
Electron Microscopy	24
General Principles in Lung Biopsy Interpretation	24
Patterns of Lung Injury	32
Anatomic Distribution	34
Reaction Patterns	35
Practical Aspects	37
3. Idiopathic Interstitial Pneumonia and Other Diffuse Parenchymal Lung Diseases	49
General Approach to Diffuse Parenchymal Lung Diseases	49
The Initial Evaluation of Patients with Suspected DPLD	49
Clinical Features	49
Signs and Symptoms	51
Laboratory Tests	51
Bronchoalveolar Lavage and Lung Biopsy	52
Classification of Idiopathic Interstitial Pneumonias	53
Liebow Classification	53
Katzenstein and Müller/Colby Classifications	53
American Thoracic Society/European Respiratory Society Classification	54
Commonly Encountered Problems in the Clinical and Pathologic Classification of the Idiopathic Interstitial Pneumonias	55
Differential Diagnosis of Interstitial Pneumonias	58
Usual Interstitial Pneumonia (Idiopathic Pulmonary Fibrosis/Cryptogenic Fibrosing Alveolitis)	59

Nonspecific Interstitial Pneumonia, Cellular and Fibrosing Patterns	73
Evolving Concept of NSIP	82
Cryptogenic Organizing Pneumonia (Bronchiolitis Obliterans Organizing Pneumonia)	82
Diffuse Alveolar Damage and Acute Interstitial Pneumonia	89
Acute Fibrinous and Organizing Pneumonia	101
Acute Interstitial Pneumonia (Idiopathic Diffuse Alveolar Damage)	103
Respiratory Bronchiolitis–Interstitial Lung Disease	106
Desquamative Interstitial Pneumonia	109
Hypersensitivity Pneumonitis	115
Sarcoidosis	123
Langerhans’ Cell Histiocytosis and Other Histiocytic Disorders	136
Langerhans’ Cell Histiocytosis	136
Erdheim-Chester Disease	144
Sinus Histiocytosis with Massive Lymphadenopathy	144
Lymphangioleiomyomatosis	147
Eosinophilic Pneumonia	160
Idiopathic Eosinophilic Pneumonias	162
Simple Eosinophilic Pneumonia	162
Chronic Eosinophilic Pneumonia	162
Acute Eosinophilic Pneumonia	164
Secondary Eosinophilic Pneumonias	167
Infectious Eosinophilic Pneumonia	168
Drug-Induced Eosinophilic Pneumonia	168
Immunologic or Systemic Diseases	168
Differential Diagnosis of Eosinophilic Pneumonia	168
Treatment and Prognosis	169
Pulmonary Alveolar Proteinosis	169
Diffuse Alveolar Hemorrhage	176
Antibasement Membrane Antibody Disease (Goodpasture’s Syndrome)	184
Idiopathic Pulmonary Hemorrhage	185
Aspiration	187
Alveolar Microlithiasis	196
4. Pulmonary Vasculitis	233
Wegner’s Granulomatosis	234
Churg-Strauss Syndrome	244
Microscopic Polyangiitis	248
Necrotizing Sarcoid Granulomatosis	251
Other Rare Causes of Granulomatous Arteritis	254

Giant Cell Arteritis	254
Disseminated Visceral Giant Cell Angiitis	254
Polyarteritis Nodosa	255
Takayasu's Arteritis	255
Behçet's Syndrome	255
Secondary Vasculitis	258
Pulmonary Infection and Septic Emboli	258
Classic Sarcoidosis	258
5. Reactive Lymphoid Lesions	265
Introduction	265
Lymphocytic Interstitial Pneumonia	266
Follicular Bronchitis/Bronchiolitis	276
Nodular Lymphoid Hyperplasia of Lung	277
Giant Lymph Node Hyperplasia (Castleman's Disease)	282
Intrapulmonary Lymph Nodes	283
6. Connective Tissue and Inflammatory Bowel Diseases	291
Histologic Spectrum of the Pleuroparenchymal Reactions	291
Rheumatoid Arthritis	293
Systemic Lupus Erythematosus	300
Scleroderma	302
Polymyositis/Dermatomyositis	304
Sjögren's Syndrome	307
Mixed Connective Tissue Disease	308
Ankylosing Spondylitis	309
Relapsing Polychondritis	310
Inflammatory Bowel Disease	310
7. Drug and Radiation Reactions	321
Drug Reactions	321
Definition and Background	321
Clinical Syndromes Associated with Pulmonary Drug Reactions	324
Pathologic Patterns Associated with Pulmonary Drug Reactions	326
Diagnosing and Treating Pulmonary Drug Reactions	340
Radiation Lung Injury	340
8. Bronchiolar Disorders	351
Introduction	351
Background	351
Pathologic Patterns of Bronchiolitis	353
Clinical Manifestations	362

Radiologic Manifestations	362
Clinicopathologic Entities	368
Asthma	368
Infectious Bronchiolitis and Postinfectious Constrictive Bronchiolitis	368
Fume-Related Bronchiolar Injury	370
Diffuse Panbronchiolitis	373
Idiopathic Bronchiolitis (Including Cryptogenic Obliterative Bronchiolitis).	375
9. Bronchial Disorders	381
Introduction	381
Infectious Bronchitis	382
Bronchiectasis	382
Cystic Fibrosis	392
Primary Ciliary Dyskinesia	399
Middle Lobe Syndrome	404
Bronchocentric Granulomatosis	408
Muroid Impaction of Bronchi.	412
Allergic Bronchopulmonary Fungal Disease	415
Plastic Bronchitis	419
Relapsing Polychondritis.	421
Tracheobronchomegaly.	423
Congenital Bronchial Cartilage Deficiency.	424
Broncholithiasis.	426
10. Obstructive Pulmonary Diseases	435
Chronic Bronchitis	435
Emphysema	441
Pathologic Evaluation of the Lung for Emphysema.	443
Proximal Acinar Emphysema (Centriacinar or Centrilobular Emphysema)	443
Panacinar Emphysema	449
Distal Acinar Emphysema.	452
Irregular Emphysema	454
Localized Giant Bullous Emphysema	455
Simple (Nonemphysematous) Airspace Enlargement.	456
Asthma	457
11. Congenital Anomalies and Pediatric Disorders.	473
Introduction	473
Anomalies of the Tracheobronchial Tree	474
Bronchogenic Cyst	478
Pulmonary Sequestration	481

Intralobar Sequestrations	481
Extralobar Sequestrations	484
Anomalies of the Lung Parenchyma	486
Congenital Cystic Adenomatoid Malformation	489
Infantile Lobar Emphysema/Polyalveolar Lobe	496
Vascular Anomalies	497
Ectopic Tissues in the Lung	507
Respiratory Distress Syndrome of the Newborn	507
Bronchopulmonary Dysplasia	511
Pulmonary Interstitial Emphysema	518
Meconium Aspiration Syndrome	522
Massive Pulmonary Hemorrhage of the Newborn	525
Pediatric Interstitial Lung Disease	525
12. Lung Infections	539
Bacterial Pneumonias	539
Common Bacterial Pneumonias	541
<i>Streptococcus Pneumoniae</i>	541
<i>Staphylococcus</i> Sp	544
<i>Streptococcus</i> Sp (Nonpneumococcal)	547
<i>Haemophilus Influenzae</i>	548
<i>Klebsiella Pneumoniae</i>	549
<i>Pseudomonas Aeruginosa</i>	550
<i>Legionella</i> Sp	553
Anaerobic Bacteria	556
<i>Nocardia</i> Sp	557
<i>Actinomyces</i> Sp	560
Uncommon Bacterial Pneumonias	563
<i>Burkholderia Pseudomallei</i>	563
<i>Francisella Tularensis</i>	565
<i>Yersinia Pestis</i>	566
<i>Rhodococcus Equi</i> and Malakoplakia	569
Botryomycosis	571
Bacillary Angiomatosis	574
<i>Tropheryma Whipplei</i> (Whipple's Disease)	575
Lung Abscess	576
Mycobacterial Pneumonias	579
<i>Mycobacterium Tuberculosis</i>	579
Nontuberculous Mycobacteria	587

Fungal Infections	592
<i>Histoplasma Capsulatum</i>	592
<i>Cryptococcus Sp</i>	600
<i>Coccidioides Immitis</i>	605
<i>Blastomyces Dermatitides</i>	611
<i>Paracoccidioides Brasiliensis</i>	614
<i>Aspergillus Sp</i>	616
<i>Zygomycetes</i>	627
<i>Candida Sp</i>	629
<i>Sporothrix Schenkii</i>	632
<i>Fusarium Sp</i>	635
<i>Pseudoallescheria Boydii</i>	635
<i>Chrysosporium Parvum</i>	636
<i>Malassezia Furfur</i>	636
Viral Infections	638
Cytomegalovirus	639
Herpes Simplex	642
Varicella-Zoster	646
Adenovirus	648
Respiratory Syncytial Virus	651
Measles	653
Parainfluenza	656
Influenza	657
Hantavirus	660
Mycoplasmal and Chlamydial Pneumonias	661
<i>Mycoplasma Pneumoniae</i>	662
<i>Chlamydia Sp</i>	665
<i>Pneumocystis Carinii</i> Pneumonia	668
Parasitic Infections	680
Protozoa	680
Toxoplasmosis	680
Amebiasis	683
Cryptosporidiosis	684
Microsporidiosis	687
Nematoda	689
Dirofilariasis	689
Filariasis	691
Strongyloidiasis	692

Trematoda	694
Paragonimiasis.	694
Schistosomiasis	696
Cestoda	699
Echinococcosis	699
Pseudoparasitic Structures.	704
13. Interpretation of Lung Biopsies from Immunocompromised Patients and Patients with Acquired Immunodeficiency Syndrome.	729
Diagnosis of Pulmonary Complications in Immunocompromised Patients	729
Lung Biopsy Interpretation in Immunocompromised Patients	730
Radiologic Patterns in Immunocompromised Patients	730
Pathologic Patterns in Lung Biopsies from Immunocompromised Patients	732
Pulmonary Complications of HIV Infection and AIDS	734
Noninfectious Pulmonary Complications of HIV Infection	736
Pulmonary Lymphoid Lesions	736
Chronic Interstitial Pneumonia Associated with Nonspecific Interstitial Pneumonia	736
Pathogenesis of Lymphoid Lesions in HIV-Infected Patients.	738
Lymphocytic Alveolitis	739
Diffuse Infiltrative Lymphocytosis Syndrome	740
Diffuse Alveolar Damage.	740
Organizing Pneumonia (Cryptogenic Organizing Pneumonia/Bronchiolitis Obliterans Organizing Pneumonia)	740
Obstructive Lung Disease and Bronchiectasis	741
Eosinophilic Pneumonia.	741
Sarcoidosis	742
Alveolar Proteinosis.	742
Pulmonary Hypertension	742
14. Transplantation Pathology	747
General Principles in Diagnosis of Pulmonary Complications in Transplant Recipients	747
Diagnosis of Pulmonary Complications	747
Evaluation of Transbronchial Lung Biopsies	747
Early Complications	749
Reperfusion Injury.	749
Acute Cellular Rejection	751
Diffuse Alveolar Hemorrhage	754
Late Complications	755
Obliterative (Constrictive) Bronchiolitis	755

Post-Transplant Lymphoproliferative Disorders	760
15. Pulmonary Hypertension and Other Vascular Disorders	767
Normal Pulmonary Circulation	767
World Health Organization Classification of Pulmonary Hypertension	768
Role of Histologic Assessment in the Diagnosis of Pulmonary Vascular Diseases	769
Pulmonary Arterial Hypertension	769
Pulmonary Venous Hypertension	777
Pulmonary Veno-Occlusive Disease	779
Pulmonary Hypertension Associated with Disorders of the Respiratory System and/or Hypoxemia	781
Pulmonary Hypertension Due to Chronic Thrombotic and/or Embolic Disease	782
Pulmonary Hypertension Due to Disorders Directly Affecting the Pulmonary Vasculature	787
Pulmonary Capillary Hemangiomatosis	788
16. Occupational Lung Diseases and Pneumoconioses	793
Introduction and General Principles	793
Coal Worker's Pneumoconiosis	795
Pneumoconiosis from Other Carbonaceous Materials	802
Silicosis	803
Asbestosis and Other Non-Neoplastic Diseases Caused by Asbestos	814
Background, Mineralogy, and Exposure	814
Asbestosis	815
Asbestos Airway Disease	822
Benign Asbestos Pleural Effusion (Benign Asbestos Pleurisy)	823
Visceral Pleural Fibrosis	825
Hyaline Parietal Pleural Plaques	826
Rounded Atelectasis	827
Overlap Among Non-Neoplastic Asbestos-Related Diseases of the Lung and Pleura	829
Silicatoses	829
Pulmonary Siderosis	833
Mixed Dust Reactions	834
Berylliosis	835
Hard Metal (Cobalt) Lung Disease	840
Pulmonary Disease and Exposure to Other Metals	842
Pulmonary Disease Associated with Inhalation of Gases and Fumes	844
Effects of Inhalation of Synthetic Fibers on the Lung	845
Nylon Flock Worker's Lung	845
Occupational Asthma and Reactive Airways Dysfunction Syndrome	846

Occupational Extrinsic Allergic Alveolitis.	847
Byssinosis.	847
Organic Dust Toxic Syndrome	848
Pulmonary Disease Associated with Intravenous Drug Exposure	849
17. Miscellaneous Diseases of Uncertain Etiology	857
Introduction	857
Inflammatory Pseudotumor (Inflammatory Myofibroblastic Tumor)	857
Pulmonary Hyalinizing Granuloma	867
Pulmonary Amyloidosis	872
Metastatic Calcification.	881
Dystrophic Pulmonary Ossification	885
Tracheobronchopathia Osteochondroplastica	888
Endometriosis	888
Bronchial Inflammatory Polyps	890
Pulmonary Involvement in Inborn Errors of Metabolism	890
Gaucher's Disease	891
Niemann-Pick Disease.	892
Fabry's Disease (Angiokeratoma Corpus Diffusum Universali)	892
Hermansky-Pudlak Syndrome.	892
Marfan's Syndrome	893
Ehlers-Danlos Syndrome.	893
Miscellaneous Diseases	893
18. Pleural Disorders	901
Pneumothorax.	901
Pleural Effusion	905
Pleuritis	910
Index	923
