

PLACENTAL PATHOLOGY

1.	Anatomy, Structure, and Function	1
	Introduction	1
	Gross and Microscopic Anatomy	1
	Amnion and Membranous Chorion	1
	Umbilical Cord	3
	Chorionic Plate and Stem Villi	4
	Terminal Villous Unit and Interhemal Membrane	5
	Basal Plate and Anchoring Villi	6
	Placental Margin and Membranes	8
	Developmental Anatomy	9
	Blastocyst Trophoblast (Days 18 to 20 of Menstrual Cycle)	10
	Nidation and Maternal Capillary Circulation (Days 20 to 28 of Menstrual Cycle)	10
	Chorionic Plate and Body Stalk (4 to 5 Weeks from Last Menstrual Period [LMP]).	10
	Villous Stromal Vasculogenesis (5 to 6 Weeks from LMP).	10
	Elaboration of Mesenchymal Villi (6 to 8.5 Weeks from LMP).	11
	Development of Stem Villi (8.5 to 11.5 Weeks from LMP)	12
	Early Implantation and Arterial Plugs (6 to 12 Weeks from LMP)	12
	Late Implantation and Arterial Remodeling (12 to 20 Weeks from LMP).	14
	Membrane Formation and Peripheral Expansion (9 to 18 Weeks from LMP)	15
	Trophoblast Proliferative Units and Placental Growth (13 to 40 Weeks from LMP)	16
	Terminal Villogenesis (22 to 30 Weeks from LMP)	16
	Functional Anatomy	17
	Fetoplacental Arterial Perfusion.	17
	Fetoplacental Venous Return	17
	Maternal Arterial Perfusion/Placental Lobule	17
	Maternal Venous Drainage/Marginal Sinus	18
	Umbilical Cord Dynamics	18
	Membranes and Labor	18
	Syncytiotrophoblast and Maternal Physiology	19
2.	Basic Pathways of Prenatal and Peripartum Injury: A Pathogenic Approach to Placental Interpretation	23
	Introduction	23
	Primary Adverse Outcomes of Prenatal and Peripartum Injury	23
	Preterm Delivery	24
	Fetal Growth Restriction	25

Hypoxic-Ischemic Injury	26
Placental Lesions	27
Subcategorization	28
Physiologic Consequences	29
Pathways of Injury	29
3. Clinical Syndromes and Their Pathologic Correlates in the Placenta	33
Clinical Diagnoses Based Primarily on Maternal History or Maternal Examination	33
Pregnancy-Induced Hypertension, Preeclampsia, and Eclampsia	33
Acute Fatty Liver of Pregnancy	34
Essential Hypertension	34
Maternal Thrombophilia (Including Maternal Deep Vein Thromboses, Pulmonary Infarcts, Cerebral Vascular Accidents)	34
Diabetes Mellitus	35
Maternal Anemias	35
Recurrent Spontaneous Abortion (Recurrent Pregnancy Loss, Habitual Abortion)	36
Primarily Fetal Conditions	36
Clinical Chorioamnionitis (Versus Histologic Chorioamnionitis)	36
Preterm Birth, Preterm Labor, Premature Rupture of Membranes	37
Post-term Pregnancy	37
Intrapartum Electronic Fetal Monitoring: Nonreassuring Fetal Heart Rate, Bradycardia, Decelerations	37
Fetal Growth Restriction, Intrauterine Growth Restriction, and the Small for Gestational Age Newborn	38
Erythroblastosis: Nucleated Red Blood Cells in the Fetal Circulation of the Placenta	41
Fetal or Neonatal Thrombocytopenias	41
Meconium-Stained Amniotic Fluid and the Meconium Aspiration Syndrome	42
Abnormal Amniotic Fluid Volume	42
4. Disorders of Placental Development	47
Introduction	47
Disorders of Membrane Development	47
Placental Membranacea	47
Circumvallation/Circummargination	47
Disorders of Uterine Implantation	49
Placenta Previa	49
Placenta Accreta, Increta, Percreta	51
Superficial Implantation	53
Disorders of Placental Migration	54
Shape Abnormalities	54

Peripheral Cord Insertion.	57
Disorders of Villous Development	59
Distal Villous Hypoplasia with Placental Undergrowth (Peripheral Villous Hypoplasia, “Terminal Villous Deficiency”)	59
Distal Villous Immaturity with Placental Overgrowth (“Delayed Villous Maturation”)	60
Disorders of Fetal Vascular Development	61
Chorangioma and Localized Chorangiomas	61
Villous Chorangioma (Hypercapillarization)	62
Diffuse Multifocal Chorangiomas	64
Genetic and Chromosomal Disorders	65
Metabolic Storage Diseases.	65
Mesenchymal Dysplasia.	66
Chromosomal Abnormalities.	68
5. Inflammation and Infection.	75
Introduction	75
Infections	75
Acute Chorioamnionitis (Histologic).	75
Subacute Chorioamnionitis	84
Acute Chorioamnionitis with Peripheral Funisitis	86
Acute Intervillositis with Intervillous Abscesses	87
Acute Villitis	90
Active Chronic Villitis and Intervillositis with Villous Necrosis.	90
Chronic Placentitis, TORCH Type	92
Chronic Intervillositis with Malarial Pigment.	96
Perinatal Infections with Minimal or No Placental Inflammation	99
Idiopathic Inflammatory Lesions.	101
Chronic Villitis (Villitis of Unknown Etiology).	101
Chronic (Histiocytic) Intervillositis (Massive Chronic Intervillositis)	107
Chronic Chorioamnionitis	107
Chronic Deciduitis	108
Eosinophilic/T-Cell Vasculitis	109
Chronic Decidual Periarteritis	110
6. Circulatory Problems: Thrombi and Other Vascular Lesions	117
Introduction	117
Circulatory Relationships in the Placenta and the Varied Effects of Intraplacental Clotting	117
Maternal Circulation: Thrombi, Hematomas, and Decidual Vascular Lesions	118
Decidual Vasculopathy: Acute Atherosclerosis and Spiral Artery Thrombi	118

Infarcts	123
Intraplacental Hematomas (Intervillous Thrombi) and Massive Subchorial Hematomas	127
Retroplacental Hematomas, Marginal Hematomas, and Placental Abruption	128
Maternal Circulation: Nonvascular Lesions.	135
Massive Perivillous Fibrin Deposition (Gitterinfarcts) and Maternal Floor Infarct	135
Fetal Circulation: Thrombi and Hematomas	141
Fetal Stem Vessel (Large Vessel) Thrombi and Fetal Thrombotic Vasculopathy	141
Fetal Vascular Narrowing and Increased Umbilical Vascular Resistance.	151
Hemorrhagic Endovasculitis	151
Endothelial Cushions of Fibrinous Vasculosis.	156
Fetal Circulation: Other Lesions	157
Subamniotic Hematoma	157
Stasis Problems	157
7. Normal Structure and Pathology of the Membranes.	163
Anatomy and Physiology.	163
Meconium Staining	164
Inflammation	168
Squamous Metaplasia.	168
Amnion Nodosum	169
Amnionic Bands.	171
Extramembranous Pregnancy	172
Gastroschisis.	175
Cysts (Subamniotic Fibrin Cysts)	175
8. Embryonic Development and Pathology of the Umbilical Cord	179
Embryonic Development.	179
Normal Umbilical Cord	179
Vestigial Remnants	180
Allantoic Remnants	180
Omphalomesenteric Remnants	180
Insertion Anomalies.	182
Velamentous Insertion and Membranous Vessels	182
Marginal Insertion	185
Furcate Insertion	186
Tethered Insertion (“Amnionic Webs”)	187
Cord Length	187
Short Cord	187
Long Cord	188

Cord Diameter	189
Numerical Variation in Umbilical Vessels	189
Single Umbilical Artery	189
Supernumerary Vessels.	192
Focal Lesions.	192
Knots	192
Abnormal Torsion	193
Stricture	196
Hematoma	196
Hemangioma	197
Abnormalities in Umbilical Cord Vessels.	197
Aneurysms	197
Segmental Thinning.	197
Meconium-Induced Necrosis.	198
Ulceration.	198
Thrombosis.	198
Rupture.	199
9. Abortion, Stillbirth, and Intrauterine Fetal Death	207
Introduction	207
Early Spontaneous Abortion, Products of Conception, and Embryonic Death	207
Late Spontaneous Abortion (Miscarriage, Stillbirth, and Intrauterine Fetal Death) .	222
10. Fetal and Placental Hydrops.	229
Introduction	229
Immune Hydrops (Erythroblastosis Fetalis, Hemolytic Disease of the Newborn) . .	229
Nonimmune Hydrops	232
Cardiovascular	232
Fetal Anemias	232
Fetal Infections.	235
Pulmonary Lesions and Other Intrathoracic Causes.	236
Major Chromosomal Disorders	236
Other Congenital Anomalies and Genetic Metabolic Diseases.	236
Fetal Tumors.	236
11. Tumor-Like Lesions and Metastatic Neoplasms.	239
Putative Primary Placental Neoplasms.	239
Hemangioma (Chorangioma)	239
Intraplacental Leiomyoma.	239
Teratomas (or Acardiac Twins?)	240
Adenoma (Choristoma?)	241
Hepatocellular Adenoma (Heterotopic Liver)	241

Heterotopic Adrenal Cortex	241
Metastatic Neoplasms	241
Fetal Primary Tumors Involving the Placenta	242
Maternal Primary Tumors Involving the Placenta	243
12. Multiple Pregnancy	249
Twin Gestation	249
Zygoty	249
Frequency and Etiology	249
Placentation	249
Umbilical Cord, Chorionic Vascularity, and Placental Mass	258
Monoamniotic Monochorionic Placentas	259
Complications of Multiple Pregnancy	261
Twin-Twin Transfusion Syndrome	261
Asymmetric Growth	268
Intrauterine Fetal Loss	269
Duplication Abnormalities	272
Higher Multiple Births	276
13. Examination Technique	283
Pathologist-Clinician Relationship	283
Approach to the Specific Clinical Scenario	283
Stepwise Handling of the Specimen	285
Gross Description	286
Technique and Rationale for Tissue Sampling	286
Multiple Pregnancy	287
Alternative Approaches to Placental Examination	289
Special Studies	290
14. Diagnostic Ultrasound in Obstetrics	295
Introduction	295
Ultrasound Imaging of the Placenta and Umbilical Cord	295
Ultrasound Imaging of the Fetus	300
First Trimester Ultrasound Examination	300
Second and Third Trimester Ultrasound Examination	300
Doppler Ultrasound in Assessment of the Growth-Restricted Fetus	304
A. Appendix: Placental Weights and Measures	311
The Value of Placental Measurements	311
Index	323
