

CONTENTS

1. Normal Anatomy and Histology of Bone Marrow	1
Fetal Hematopoiesis	1
Hematopoiesis	1
Stem Cells	1
Bone Marrow Microenvironment	2
Regulatory Factors	2
Lineage Development	3
Granulocytic Cells	3
Monocytic and Dendritic Cells	9
Other Granulocytic Cells	13
Erythroid Cells	15
Megakaryocytes	20
Lymphoid and Natural Killer Cells	22
Bone	30
Age-Related Normal Bone Marrow Histology	32
2. Procurement and Interpretation of the Bone Marrow Specimen	41
Indications for Bone Marrow Biopsy	41
Procurement, Quality Considerations, and Interpretation of the Bone Marrow Specimen.	41
Key Components for Optimal Bone Marrow Assessment	41
Biopsy Sites and Potential Procedural Complications	42
Sampling and Preparation of Bone Marrow Aspirate and Core Biopsy	42
Adequacy and Quality Considerations	44
Microscopic Interpretation of the Bone Marrow Aspirate and Biopsy: Qualitative and Quantitative Aspects	47
Utility of Special Techniques	48
3. Laboratory Evaluation of Blood and Bone Marrow in Non-Neoplastic Disorders	57
Peripheral Blood Smear Evaluation	57
Red Blood Cells	57
White Blood Cells	57
Platelets	61
Age-Related Factors	62
Additional Considerations	63
Bone Marrow Evaluation	65
Overview	65
Importance of Bone Marrow Cellularity	66
Interpretation of Pediatric Bone Marrow Specimens	69

Interpretation of Adult Bone Marrow Specimens	70
Documentation	71
4. Non-Neoplastic Erythroid Lineage Disorders	75
Erythropoiesis	75
Numerical and Morphologic Abnormalities of Erythroid Elements	76
Blood	76
Bone Marrow	78
Overview of Anemias	79
Acquired Anemias	81
Anemia of Chronic Disease	81
Iron Deficiency Anemia	83
Megaloblastic Anemia	84
Hemolytic Anemias	89
Sideroblastic Anemia	94
Red Cell Aplasia and Other Hypoplastic Disorders	95
Constitutional Anemias	99
Hemoglobinopathies/Erythrocyte Enzyme Deficiency Disorders	99
Hereditary Spherocytosis and Other Erythrocyte Membrane Disorders	102
Congenital Dyserythropoietic Anemia	105
Congenital (Hereditary) Megaloblastic Anemia	107
Constitutional Single and Multilineage Bone Marrow Failure Disorders with Anemia	109
Overview of Erythrocytosis	111
Classification of Erythrocytosis	111
Isolated Erythrocytosis versus Multilineage Abnormalities	115
Erythroid Manifestations of Systemic Disorders	115
Treatment-Related Erythroid Lineage Effects	116
Differential Diagnosis of Erythroid Disorders	117
5. Non-Neoplastic Granulocytic and Monocytic Disorders	125
General Concepts	125
Myelopoiesis	126
Neutrophilia	127
Growth Factor Effect in Bone Marrow	131
Leukemoid Reaction versus Chronic Myelogenous Leukemia	135
Neutrophilic Disorders that Imitate Neoplastic Processes in Children	137
Congenital Neutrophilia	138
Neutropenia	138
Acquired Neutropenia in Adults	139
Acquired Neutropenia in Infancy and Childhood	142
Congenital Neutropenias	143

Abnormal Neutrophil Morphology	147
Nuclear Segmentation	147
Cytoplasmic Granulation and Vacuolization.	150
Eosinophilia	152
Basophilia	158
Monocytes	159
Monocytosis	161
Monocytopenia	165
6. Non-Neoplastic Megakaryocytic Lineage Disorders	177
General Concepts	177
Normal Megakaryocyte Development and Platelet Homeostasis	177
Morphologic Abnormalities of Platelets and Megakaryocytes.	185
Platelet/Megakaryocytic Disorders in Children and Adults	190
Constitutional Megakaryocytic Disorders with Thrombocytopenia	193
Acquired Megakaryocytic Disorders with Thrombocytopenia	200
Constitutional and Acquired Megakaryocytic Disorders with Thrombocytosis	205
Megakaryocytic Abnormalities in Infectious and Noninfectious Systemic Diseases.	206
Therapy-Related Megakaryocytic Abnormalities	208
Differential Diagnosis of Non-Neoplastic Megakaryocytic Disorders	210
7. Bone Marrow Failure Disorders	221
General Concepts	221
Constitutional Disorders Affecting Multilineage Hematopoiesis	223
Fanconi Anemia	223
Dyskeratosis Congenita	227
Familial Aplastic Anemias	229
Congenital Amegakaryocytic Thrombocytopenia.	229
Other Congenital Disorders Associated with Multilineage Hematopoietic Failure.	230
Constitutional Disorders Affecting Predominantly Single Lineage Hematopoiesis.	231
Diamond-Blackfan Anemia	231
Congenital Dyserythropoietic Anemias	233
Shwachman-Diamond Syndrome.	233
Severe Congenital Neutropenia/Kostmann Syndrome	234
Thrombocytopenia with Absent Radii	235
Acquired Disorders Affecting Multilineage Hematopoiesis	236
Idiopathic Aplastic Anemia	236
Paroxysmal Nocturnal Hemoglobinuria.	239
Relationship of Aplastic Anemia and Paroxysmal Nocturnal Hemoglobinuria: the AA/PNH Syndrome	241
Other Acquired Disorders Associated with Multilineage Hematopoietic Failure	242

Acquired Disorders Affecting Single Lineage Hematopoiesis	242
8. Non-Neoplastic Lymphoid and Plasma Cell Disorders	249
Lymphocytes in Blood	249
Normal Lymphocyte and Plasma Cell Parameters in Bone Marrow	254
Hematogones	255
Lymphocyte Immunophenotype	255
Plasma Cells	255
Constitutional Disorders with Abnormal Lymphocytes	258
Non-Neoplastic Diffuse Lymphoid Infiltrates in Bone Marrow	259
Increased Hematogones in Bone Marrow	259
Diffuse Non-Neoplastic T-Cell Infiltrates in Bone Marrow	262
Systemic Polyclonal Immunoblastic Proliferations Involving Bone Marrow	263
Benign Lymphoid Aggregates in Bone Marrow	264
Polyclonal Plasmacytosis in Bone Marrow	274
Systemic Illness	274
Hematopoietic Failure	274
Monoclonal Gammopathy of Undetermined Significance	277
Differential Diagnosis of Non-Neoplastic Lymphoid and Plasma Cell Disorders	277
9. Disorders of Bone Marrow Stroma and Bone	283
Components of Bone Marrow Stroma	283
Bone Marrow Stromal Disorders	284
Gelatinous Transformation of Bone Marrow	284
Bone Marrow Necrosis	286
Amyloid Deposition in Bone Marrow	289
Bone Marrow Fibrosis	291
Granulomatous and Diffuse Histiocytic Disorders in Bone Marrow	295
Iron Disorders in Bone Marrow	304
Crystal Deposition in Bone Marrow	309
Structural Disorders of Bone Marrow	311
Vascular Abnormalities Including Neoangiogenesis	311
Acquired and Constitutional Bone Abnormalities	313
Evaluation of Stroma	321
10. Bone Marrow Features of Systemic Infections	327
General Concepts	327
Bone Marrow Granulomas in Infectious Diseases	328
Fungal Infections Associated with Immunosuppression	331
Human Immunodeficiency Virus Infection	331
Peripheral Blood and Bone Marrow Findings in Patients with AIDS	332
Opportunistic Infections Associated with AIDS	334

Herpesvirus 8–Associated Multicentric Castleman Disease	338
Infectious Mononucleosis (Epstein-Barr Virus)	338
Infectious Mononucleosis Type Syndromes	342
Cytomegalovirus	342
Parvovirus Infection	344
Bacterial Infections	348
Sepsis	348
<i>Bordetella Pertussis</i>	348
Ehrlichiosis	350
<i>Borrelia</i> (Relapsing Fever)	351
Protozoa Infections	351
Malaria (<i>Plasmodium</i> Species)	351
Babesiosis	354
Trypanosomiasis	354
Helminth Infections	356
Filariasis	356
Emerging Infections	356
Hantavirus Pulmonary Syndrome	356
Severe Acute Respiratory Syndrome	358
Infection-Associated Hemophagocytic Syndrome	359
11. Noninfectious Systemic Diseases and Miscellaneous Bone Marrow Conditions	371
Anemia of Chronic Disease	371
Collagen Vascular (Rheumatologic) Disorders	372
Constitutional and Acquired Immunodeficiency Disorders	375
Lysosomal Storage Diseases and Other Constitutional Disorders	379
Chronic Renal Failure	383
Chronic Alcoholism	384
Pregnancy-Associated Bone Marrow Disorders	386
Heavy Metal Toxicities	387
Unique Post-Therapy Effects in Bone Marrow	388
Assessment of Patients with Systemic Disorders	392
Appendix	397
Index	403
